

handle applicators machines

This handle applicator provides a safe, strong and ergonomic handle. We are committed to exceed the expectations of those who seek the best.

>> general features

The automatic handle applicators can apply handles on shrink film packs, cardboard cases, briks, paper rolls or any type of rigid packs. In addition products can pass through the automatic handle applicators without any handle being applied on them. The automatic handle applicators can apply different types of handles, joined to a transparent adhesive tape and made from: precut cardboard labels, pre-handled adhesive tape reels, paper and polypropylene handles on reel. At the moment, 4 models are available, differing in the their speed: outputs up to 25, 40, 60, 80 packs for minute PPM- depending on the pack dimensions.

>> specific features

Thanks to the new optional handles on reel Bel are even more flexible, allowing to use also paper and polypropylene tape reels. In this case the paper or polypropylene reel is cut and applied onto the adhesive tape, as an alternative to pre-cut cardboard or per-handler adhesive tape. Thanks to the large reel diameters, waiting times are reduced.

>> details

Precutting device for carton & carton's stock.

Double dispenser unit for adhesive tape.

Double dispenser unit for cartons rolls. Optional: handles on rolls.

Easy access with opening windows and doors.

Intralox belt.

Fast change of format, sizes indicated on the metric line.

Can be integrate in our packaging lines.

High speed. Up to 80 pcs/min, easy change of format.

High quality ISO certificated components.
